Web Brain IT Academy Tashkent Uzbekistan (Dec 2021)

- **Fast Food delivery** real project
- https://fastfoodakbarjon.netlify.app/
- Worked with React and DOM libraries
- Experienced with hooks, APIs, and Styled Components

Latest Projects

- **Shopify app store** – lately I am working with store development and I built 2 stores the first one is in Shopify template language **Liquid. (https://github.com/akbarjon2000/OnlineStore-test)**
- **Scandiweb store** – this is a react application using graphQL endpoint. I used apollo to interact with it. And one difference of this store is, I worked with only class components in it. **(https://github.com/akbarjon2000/Scandiweb)**
